MAINTENANCE & REPAIR

Powersan New Energy In the World

Powersan Makina Sanayi Ltd.Sti

Our Service, Your Choice

Powersan Makina Sanayi Tic.Ltd.Sti was founded 2007. Our company is a modernizedscale integrated company contributing to R&D, manufacturing and selling electrical gensets. We have an over 7000 square meters manufacturing workshop to complete the production and packaging of electrical gensets. Our products have 8 series and over 100 products specifications. All of our products match the requirements of international quality standarts and our multiseriess products have been proved by CEwith the quality management of ISO9001.

Watercooled diesel electrical genset is te main product of our company, using famous international engine brands including Cummins, Volvo, Perkins and adapting the technology of noise reduction. We produce over 2000 gensets across buildings, hospitals, hotels, telecommunication stations, databases, municipal engineering, mining industries, with power in a range of 5 Kw to 1200 Kw. We also produce series of STC and SLG gensets with mature techniques. They are wideli used in areas of agriculture, individual households, breeding cultivation etc. We are selling our products in distant markets in Europe, Southeast Asia, Africa and Middle East.

Recently, our company is handled by introducing talents, purchasing digital and product testing equipment, establishing R&D technology center for production of new products with special R&D fund. Our R&D center tests the new product in multiple steps and then put them into manufacturing channel. Our company consists of development of scientific and technological innovations while ;maintaining the diversified company culture.
